**Design Thinking in the Area of
Computer Science & Engineering**

Date – 23/01/2023
Time – 2.30 pm to 3.30 pm
AV –Room (Block –A)

Mr. Ajit Shrivastava
Convenor –IIC SISTec-R
Innovation Ambassador

Innovation Ambassador Activity @ Institutional Innovation Council (**IIC**) at Sagar Institute of Science Technology and Research Bhopal organized Interactive session on “**Who is an Entrepreneur?**” on 06th February 2023.

Objective:

The idea behind conducting the session was to make them aware of how design thinking is an integral part of project development in computer science & engineering.

The students were demonstrated with the live example of information gathering for a given problem. They were asked to collect information from one another in the teams formed and to write down the requirements generated. After five minutes of discussion with each other on the same requirements, they were asked to frame them into a problem to be solved. With this many other views came into existence for that product design.

With this activity students understood the importance for interaction between client and service provider to better understand the demand and thereafter what to be designed will be the outcome. This is going to help them in completing their project and will help in future projects of the company in which they are going to serve or being as an entrepreneur.

Attendees:

45 Students of Computer Science Engineering of Sagar Institute of Science Technology & Research, Bhopal.
