Innovation Ambassador Activity @ Institutional Innovation Council (IIC) at Sagar Institute of Science Technology and Research Bhopal organized Interactive session on “Creative and Out of Box Thinking” on 23<sup>rd</sup> February 2023.

## Objective:

### Why You Need to Think Outside the Box

Thinking outside the box simply means that you're willing to consider different solutions and methods for reaching your desired outcome. That is to say: You want to get from point A to point B, but you don't necessarily need or want to take the tried and true route to get there.

Thinking differently can have a powerful and positive effect on your career. As an entrepreneur, here's why you need to think outside the box and how it can help you get ahead:

Speaker **Mr. C. K. Pardhi**, explained about the phrase "thinking outside the box" is often used to describe a type of creative thinking that goes beyond conventional or established ideas. He gives some examples of thinking differently with simple problems also.

The nine dots puzzle consists of nine dots arranged in a square shape, and the challenge is to connect all nine dots using only four straight lines without lifting the pen from the paper. Most people's first instinct is to stay within the boundaries of the square shape, but the solution requires going beyond the boundaries of the box.

### Benefits of outside-the-box thinking

Because thinking outside the box can help to foster creativity and innovation, it often results in new and improved ideas, products, and services. It can also lead to better problem-solving, increased productivity, and more effective communication.

Thinking outside the box allows you to:

- Generate new and creative ideas that challenge the status quo
- Solve problems more efficiently and effectively
- Identify opportunities that may have been overlooked
- Develop more innovative products and services
- Foster a culture of creativity and innovation

### Attendees:

40 Students of Mechanical and Civil Engineering of Sagar Institute of Science Technology & Research, Bhopal.
